3,774 papers mention "**Augusto Sagnotti**".

[String theory clues for the low- \$\ell\$ CMB ?](#)

by

N. Kitazawa, A. Sagnotti

This mention was found in a paper hosted outside of Academia.edu

...hors, published by EDP Sciences, 2015 String theory clues for the low- CMB ? N. Kitazawa 1 , a and **A. Sagnotti** 2 , b 1 2 Department of Physics, Tokyo Metropolitan University Hachioji, Tokyo 192-0397, JAPAN Depa...

[Bosonic massless higher spin fields from matrix model](#)

by

Saitou, Takashi

This mention was found in a paper hosted outside of Academia.edu

..., "BRST approach to higher spin field theories," arXiv:hep-th/0511276. A. Sagnotti and M. Tsulaia, "**On higher spins and the tensionless limit of string theory**," Nucl. Phys. B 682, 83 (2004) [arXiv:hep-th/0311257]. N. Ishibashi, H. Kawai, Y. Kitazawa and A. T...

[Generalized Littlewood-Richardson rule for exceptional Lie algebras \$E_6\$ and \$F_4\$](#)

by

Hoshino, Ayumu

This mention was found in a paper hosted outside of Academia.edu

...n simple current extensions, Phys. Lett. B 396 class group representations, Int. J. [Ba2] Sagnotti, **Open strings and the relative modular group**, Phys. Lett. [BS] subfactors arising [BEK] [DLM] abelian groups and homotopy [EM] [F 3 S] and three...

[Six-dimensional origin of gravity-mediated brane to brane supersymmetry breaking](#)

by

George Diamandis

[\(HALF\) A LECTURE ON D -BRANES](#)

by

BACHAS, C.

This mention was found in a paper hosted outside of Academia.edu

...4, 2073 (1989); P. Horava, Phys. Lett. B 231, 251 (1989); M.B. Green, Phys. Lett. B 266, 325 (1991) **A. Sagnotti**, Non-Perturbative Quantum Field Theory, eds. G. Mack et al, (Pergamon Press) 521; G. Pradisi and A....

[Toroidal compactification without vector structure](#)

by

Edward Witten

This mention was found in a paper hosted outside of Academia.edu

...92. J. H. Schwarz, "Superstring Theory," Physics Reports 89 (1982) 223. N. Marcus and A. Sagnotti, "**Tree Level Constraints On Gauge Groups For Type-I Superstrings**," Phys. Lett. 119B (1982) 97. S. Sethi and A. Sen, "The Mirror Transform Of Type I Vacua In Six-Dim..."

[Analyzing a formula concerning the Zeros of the Davenport Heilbronn Function. Further new possible mathematical connections with some equations concerning some sectors of String Theory and Supersymmetry Breaking. III](#)

by

Michele Nardelli

In this research thesis (part III), we analyze a formula concerning the Zeros of the Davenport Heilbronn Function. We describe further new possible mathematical connections with some equations concerning some sectors of String Theory and Supersymmetry Breaking. Below the link of some papers that are the continuation of this work:

... to the dilaton value ϕ and to the value of the following Rogers-Ramanujan continued fraction: From **AdS Vacua from Dilaton Tadpoles and Form Fluxes** -J. Mourad and A. Sagnotti -arXiv:1612.08566v2 [hep-th] 22 Feb 2017 - March 27 $M^2/3*[1-(b/euler\ nu...$

[f \(T \) Non-linear Massive Gravity and the Cosmic Acceleration](#)

by

Wu, You, Chen, Zu-Cheng, Wang, Jia-Xin, Wei, Hao

This mention was found in a paper hosted outside of Academia.edu

...0603057 . G. 't Hooft and M. Veltman, Annales Poincare Phys.Theor. A20, 69 (1974). M. H. Goroff and **A. Sagnotti**, Nucl.Phys. B266, 709 (1986). T. P. Sotiriou and V. Faraoni, Rev.Mod.Phys. 82, 451 (2010), arXiv:08...

[On the application of the \$\kappa\$ formula concerning the Zeros of Riemann Zeta Function. Further new possible mathematical connections with some equations concerning some sectors of String Theory and Supersymmetry Breaking.](#)

by

[Michele Nardelli](#)

In this research thesis, we analyze the κ formula concerning the Zeros of Riemann Zeta Function. We describe further new possible mathematical connections with some equations concerning some sectors of String Theory and Supersymmetry Breaking.

[more ▾](#)

[Further applications of the \$\kappa\$ formula concerning the Zeros of Riemann Zeta Function. New possible mathematical connections with some equations concerning some topics of Field Theory and Gravity, String Theory and Supersymmetry Breaking. II](#)

by

[Michele Nardelli](#)

In this research thesis (part II), we analyze the κ formula concerning the Zeros of Riemann Zeta Function. We describe further new possible mathematical connections with some equations concerning some topics of Field Theory and Gravity, String Theory and Supersymmetry Breaking. Below the link of two papers connected to this work: <https://www.academia.edu/47700752/> <https://www.academia.edu/47733892/>
